Select yours from the uploads tab, drag, and then drop inside the frame!

How SOLT works?

Guests sitting on Table 12 press the SOLT button for an additional order

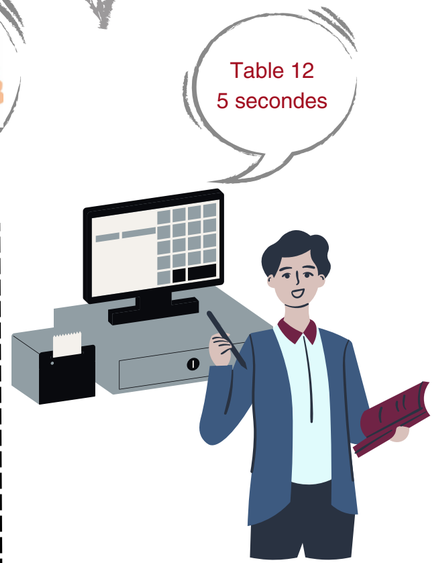

Once ready, the kitchen will inform the right waiter by pressing the correponding button

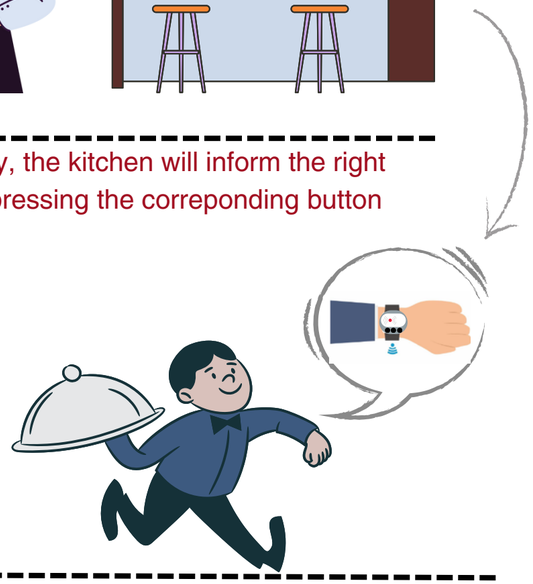

At the same time, call is transmitted directly to the main display for the attention of ony waiters

Waiter receives instantly the call on his pages and reacts accordingly to serve Table 12

SOLT software enables live controls and audit : number of calls , guests waiting time , etc. Service speed reports can be downloaded for control

The waiter responsible for Table 12 will be able to serve the warm order without delay to his overwhelmed guests
